

COVID-19 Community Update

Old Crow Entering High-Risk Level

Due to the COVID-19 outbreak and rising cases across the territory, Old Crow is in the high risk level.

The Vuntut Gwitchin Community Emergency Act has been enacted. Fines could be issued for not following the rules. Please continue doing the right thing to keep our community safe by staying home. Please follow all public health measures to protect our community's most vulnerable.

Public Health Measures

- Everyone must stay home to prevent an outbreak. Do not leave your house until the risk level decreases.
- It is too risky for anyone to have a gathering right now. You are not allowed to visit in-person with people outside their home, unless they are in your two-household bubble.
- There is a mandatory curfew from 10pm-5am
- If you start feeling sick, even if it just feels like the sniffles, we need you to call the nursing station right away at 966-4444 and stay home for two weeks.
- You will also be required to stay home for 14 days if:
 - You're living with someone who is being tested for COVID-19 or has received a positive test result.
 - You're coming back from travel out of Old Crow
 - And if you attended any gatherings

Coming Together as Gwich'in By Staying Apart
