

Community Energy Plan & Dinner

July 17, 2014

5 P.M. Community Hall

The Natural Resources Department is working with Urban Systems Ltd. in developing a community energy plan to address current energy challenges in Old Crow for the future. This plan will identify challenges, goals and long term priorities and provide recommended solutions.

Community input is important for an effective and practical plan.

Discussions will include:

- Energy production, supply and demand
- Buildings and infrastructure
- Lighting, equipment and appliances
- Household practices related to energy

Please join Natural Resources and Urban Systems in this planning for future energy use, efficiency and responsible solutions
